## ENVIROSIGHT QUICKVIEW AIRHD CUSTOMER DEMO

Report by Terri Rodina

Recently Key Equipment & Supply Company demonstrated the Envirosight Quickview airHD to a local municipality in Missouri. The conditions of the pipe, protruding laterals, debris in the pipe, and complete line segments were seen rapidly and assessed. The Quickview airHD uses high-powered zoom optics from an adjoining manhole to determine what cleaning, repairs, or if further inspection is needed. It can be deployed for quick inspections of tanks, basins, and manholes. The performance features of the Quickview airHD make it more affordable, faster, and easier to assess sewer conditions; helping to ensure that your systems operate more smoothly. The app-based touch screen is compatible with your iOS, Android, or Windows device and wirelessly maneuvers the camera zoom and tilt. With the Quickview airHD you can wirelessly adjust the illumination, overlay text, view video, and upload your results. Contact your Territory Manager to schedule a demo!

### CITY OF OKMULGEE JETSCAN 2.0 PURCHASE

The City of Okmulgee and Kevin Brill decided to purchase a Jetscan 2.0 from Key Equipment & Supply Company and Quality Rents Oklahoma Territory Manager, Josh Pandian. The Jetscan 2.0 allows their crews to inspect lines before and/or after maintenance! This permits them to be more efficient and effective with their combo machine, by helping them choose the correct tools to use for cleaning. The Jetscan 2.0 will also enable them to do post-cleaning inspection, verify if further rehab is needed, and provide the operator with video of bored gas lines in the section they are about to maintain. Contact your Territory Manager for more information on the Envirosight Jetscan 2.0.

### EMPLOYEE SPOTLIGHT

Mike Lane began his 26-year career at Key Equipment & Supply Company as a Service Tech in May 1996. He transitioned into working on CCTV inspection systems in 1999. Currently, Mike is the Envirosight Lead CCTV Technician. Married to Kelly Lane, Branch Manager, they have two daughters, one son, and four grandchildren between them. Mike enjoys working on old cars, riding motorcycles, precision shooting, and going fishing with his wife.

### QUICKVIEW AIR HD

#### FEATURES

- Remote-adjustable camera angle and height adapts quickly to any inspection situation.
- System components travel in compact, rugged roller case with telescoping handle.
- Collapsible pole fits in pick-up bed, but extends to 25' or 30' (depending on model).
- Rechargeable, swappable 4-hour lithium-ion batteries ensure you're always powered up.
- WiFi-based control and video transmission means no cables.
- Clamp-on bipod allows hands-free operation for maximum image stability.
